As of 3/31/07, the TOTAL MILEAGE since VarChandra began operating NYC 3 on May 14, 1992 equals: 256,728

As of 3/31/07, the TOTAL MILEAGE since the PC 2 truck rebuild was completed on April 12, 1998 equals: 188,241

As of close of year 2006 NYC 3 has run 154 trips. A number of these involved a segment on VIA Rail, but almost all started and ended on Amtrak except for the Metro North excursions by the Danbury Railway Museum and a few trips long ago on the Morristown & Erie Railway.

A "trip" is from a single starting point to the same ending point and ranges from a one-day round trip—e.g. to the races at Saratoga—to a 3-week transcontinental trip.

The 154 trips have involved more than 550 different Amtrak trains with zero accidents or injuries to passengers and only one equipment accident—which occurred when a CSX switch engine collided with the car at almost 20 mph while the car was parked and caused \$25,000 in damage. NYC-3 has delayed an Amtrak train only once, and that was because a scheduled switch engine arrived late, resulting in late switching onto the waiting Amtrak train.
